KONDURU HEMA SAI VAISHNAVI

Computer Science & Engineering Student | AI/ML | Full-Stack Development

Andhra Pradesh, India | +91 7382597938 | Email | GitHub | LeetCode | LinkedIn

PROFESSIONAL SUMMARY

Computer Science and Engineering student with an 8.72 CGPA and hands-on experience in AI/ML and full-stack development. Built projects involving computer vision, machine learning, QR-based verification, and an affordable agriculture robot concept. Familiar with generative AI and AI productivity tools, and interested in applying programming and problem-solving skills to customer-focused technology.

EDUCATION

B.Tech, Computer Science and Engineering 2024-2028

KKR & KSR Institute of Science and Technology | CGPA: 8.72/10.00

Intermediate (MPC) | Sri Chaitanya Junior College 2022-2024

Percentage: 94%

SSC | New Kennedy High School 2021-2022

Percentage: 96%

TECHNICAL SKILLS

Programming: Python, Java, C | Web: HTML, CSS, React | Backend: Express.js, basic backend development

AI/ML: Artificial Intelligence, Machine Learning, Generative AI, Decision Trees, MediaPipe, prompt engineering

AI & Developer Tools: AI tools, Git, GitHub, Visual Studio Code, Figma | Data: Pandas, NumPy, scikit-learn, Matplotlib

Databases: MySQL, MongoDB | Operating Systems: Windows, macOS | Core CS: Data Structures, Operating Systems

PROJECTS

Speculum - AI-Powered Smart Mirror

- Developed a camera-based smart mirror prototype using Python and MediaPipe to detect posture and provide posture-improvement suggestions.
- Added a simple user-input flow for personalized results; designed for exercise, yoga, and pose practice.

Smart Fraud Detection for Free Bus Travel Scheme

- Designed a mobile-based concept to reduce ticket misuse through Aadhaar QR scanning and passenger verification.
- Included eligibility checks based on gender and location, with support for disabled passengers. Technologies: Python, QR scanning, frontend, and basic backend development.

Diabetes Prediction Using Decision Tree

- Built a supervised machine-learning model using medical dataset features; performed preprocessing and feature selection.
- Evaluated the model using accuracy and a confusion matrix; reported 92% accuracy. Technologies: Python, Pandas, NumPy, scikit-learn, Matplotlib. Project repository: GitHub.

Agribot-X - Affordable Smart Farming Robot

- Contributed to a modular farming-robot concept for seed dispensing and targeted pesticide spraying.
- Planned remote operation using ESP32, adjustable wheels/chassis, and solar-assisted charging for practical farm use.

INTERNSHIP EXPERIENCE

AI/ML Intern | TFI | 2 months

- Completed a two-month internship in an AI/ML role.

Full-Stack Developer Intern | Code2Future

- Worked as a full-stack developer intern.

ACHIEVEMENTS & CERTIFICATIONS

- Filed/granted patent for "Speculum"; 1st Prize, THUB 2026; 1st Prize, Bid & Build Ideathon; 3rd Prize, college project competition.
- Certificate of Excellence for project work; School Topper (1st Rank) in Class 10; IoT Bootcamp Special Appreciation Certificate.
- Certifications: Prompt Engineering; Machine Learning - Scalar.

LEADERSHIP & SOFT SKILLS

Communication Coordinator, Jeevan Kaushal Club | Coordinator, KV Club | Technical Lead, Speculum | Technical & Communication Lead, Fraud Detection Project

Communication and presentation | Teamwork | Problem-solving | Time management
